清细胞医院

清Cell

For more youthful self

Korea's premium Medical Service,
清潭Cell's representative program

<清Cell Program> is a program that injects stem cells into the blood vessels directly for regeneration and anti-aging of the whole body.

Stem Cell is extracted from the bone marrow, and without cultivation highly enriched stem cell is injected into the blood vessels. All of the procedures (bone marrow extraction, stem cell extraction, blood vessel injection) are done in half-day and there are no issues in daily life starting the day of the procedure.

Stem Cells strengthen the regeneration of immunization and delay the aging stages by regenerating the blood vessels. Also, this procedure is proven to prevent and treat adult diseases such as hypertension, diabetes, hyperlipidemia, cardiovascular disorder, cerebrovascular disorder and other hard curable diseases such as atopy, psoriasis, rheumatoid arthritis, autoimmune diseases, stroke, dementia.

性Cell

For more enjoyable sex life

**Korea's premium Medical Service,
清潭Cell's most popular program**

**<性Cell Program> is a program that enhances
the satisfaction of sex life by injecting stem cells
into the person's sexual organ.**

For men, impotence occurs when blood vessels become narrow and weak due to aging, smoking, alcohol consumption, diabetes, or hypertension...etc. Stem cells regenerate those narrowed and weakened vessels to strengthen them to have the erectility of early days.

For women, colpoxerosis occurs due to decrease of estrogen secretion after climacterium (menopause), which can cause dyspareunia and frigidity of women. Stem cells will increase the amount of vaginal lubrication secretion and enhance the sexual satisfaction and sensitivity as well as improvement of urinary incontinence.

With middle-aged customers' recommendation, 清潭Cell program we also highly recommend this program.
